# AIRPORT DIAGRAM

WICHITA MID-CONTINENT (ICT)  
WICHITA, KANSAS

AL-987 (FAA)

## HOT SPOT INTERSECTIONS

1. Aircraft taxiing to/from the “T” hangars on Taxiway “Hotel” utilize caution when maneuvering in and around the hangars for other taxiing aircraft and vehicles.
2. Taxiway “Romeo”, located on the south edge of the terminal ramp, is part of the movement area and requires contact with ATC. Exercise caution when transitioning from the non-movement part of the ramp to Taxiway R.
3. Use caution when taxiing on the Taxiway “Bravo” complex. Taxiway B affords access to all runways, Taxiway B1 serves Runway 19L/1R. Taxiway B2 serves Runway 14/32.
4. One of the most confusing areas on Mid-Continent Airport is the “Charlie” and “Kilo” taxiway complex located on the west side of the airfield. These taxiways provide access to Runways 19R/1L and 14/32. While from an aerial view it may not look so confusing, the airport layout takes on a whole new look at ground level.
